

CRAZY KICKBALL

1. Kickers will come up one at a time and kick the ball into the field then run around all the bases for a home run.

2. Kickers must touch each base with their foot.

3. While one kicker runs, the next kicker comes up to home plate and kicks.

4. There are many balls so there can be many runners going around the bases at a time.

5. Out fielders retrieve the kicked balls, pass them infield and put them into the container, at the pitcher's mound.

6. The outfielders are trying to quickly pass the balls infield to keep the container full.

7. Pass the ball to each other rather than running with it all the way back.
